## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. Although the prior art teaches a zoom lens comprising three lens groups having refractive powers of negative, positive and positive respectively and further having similar structure as claimed in independent claim 1, the prior art fails to teach such a system having at least two aspheric surfaces in both the first and second lens groups wherein all mathematical limitations are satisfied as claimed in independent claim 1 such that a rejection would be proper.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hoshi et al (USPN 6862143), Watanabe (USPNs 6819499 and 6614599), Hirakawa (USPN 6804064) and Nanba et al (USPN 6822808) all teach of zoom lens systems with similar structure to the instant invention.
